Professional Career

01/2023 – present
SupplyOn AG, Hallbergmoos

Manager Product Development | SRM/Portal Solutions (from 01/2024)

- Responsible for managing a team of (10+) product owners and product experts in the product areas of Source-to-Contract, Supplier Quality Management and Portal Solutions in the environment of complex manufacturing processes
- Drive technical excellence and sustainable development practices with a focus on maintenance, refactoring, automated testing, and reduction of technical debt
- Initiation and step-by-step transformation from a project-oriented to a product-oriented way of working as well as optimization of requirements and support processes

Product Owner | SRM/Portal Solutions (from 01/2023)

- Designed, implemented, and maintained solutions in the product area Source-to-Contract (esp. Sourcing and Document Management)
- Planned and executed modernization packages for the complex legacy Sourcing application to enhance UI/UX, reduce complexity, and standardize the software.
- Extended the Document Management application with DocuSign integration for automated contract creation and tracking of digital signature processes

07/2015 – 12/2022
knowis AG, Regensburg

Senior Product Manager and Squad Lead | Banking Solutions (from 11/2020)

- Developed BPM- and microservice-based banking solutions, software components, and templates with focus on „Loan Origination and Management"
- Designed and set up a self-learning portal and dedicated training environments to streamline internal processes and knowledge transfer
- Continuation of the sub-area of Bilanzkritik (see below)

Head of Engineering | Bilanzkritik (from 07/2018)

- Managed a web application deployed in over 190 banking institutions for qualitative balance sheet analyses
- Tripled licensing revenue and doubled average annual project turnover by transforming the department from a passive requirements receiver into a proactive source of ideas and solutions
- Reduced maintenance and testing efforts while increasing software quality by optimizing development processes and reissuing test suites

Product Manager | Bilanzkritik (from 07/2015)

- Captured and translated customer requirements into concrete features; introduced a standardized procedure for customization requests and developed software artifacts (HTML, CSS, XML, JSON)
- Organized project deliverables, license billing, deadlines, resources, costs, and budgets.
- Executed and maintained software tests while providing continuous customer support; reduced response and processing times by integrating MS Teams and macros into the support portal

Team Leadership

- Led interdisciplinary teams of software developers, architects, product managers, testers, and working students (up to 11 members)

06/2014 – 06/2015
Deloitte & Touche, Stuttgart

Business Consultant | Software Asset Management and Software License Reviews

- Advised clients on selection and integration of software asset management systems through operational deployment
- Conducted multiple software compliance reviews for international clients across IT, technology, retail, fashion, and pharmaceutical industrie

3/2012 – 12/2012
Siemens AG, Amberg

Working Student | International Project Management in Information & Technology area

- Planned and updated overall project schedules for a new manufacturing facility in China
- Designed and implemented project-relevant processes and work guidelines
- Organized appointments and workshops, recorded meeting content, and created training materials for new project employees

10/2008 – 03/2013
University of Regensburg

Student Assistant | Screencast Services

- Led a team for recording, processing, and publishing courses and guest lectures on online platforms
- Procured and maintained hardware and software for production
- Introduced new recording techniques and solutions

08/2009 – 10/2009
media21 e.K., Regensburg

Intern | in the field of "new media"

- Distributed media products and services.
- Provided initial customer support and follow-up advice.
- Developed training materials and produced video tutorials for telecommunications software applications.

Education

10/2007 – 12/2013
University of Regensburg

Master Business Informatics (from 10/2010)

- Focus: Business Information Systems
- Master's Thesis: Identification of Central Users in Enterprise Social Networks

Bachelor Business Informatics (from 10/2007)

- Focus: IT Security
- Bachelor Thesis: Evaluation of the Traffic of Update Discovery Processes in Popular Desktop Applications
